

LED Dimmer Model 121

- Keep the old fixtures and replace to LED light sources
- Up to 100pcs. 8W LED.
- Up to 6 optional dimming steps or stepless, through the use of buttons
- Can be controlled with digital bus systems

Dimmer Type 121 is specially developed for the market, where the old fixtures desired reused.

A great saving is achieved with existing fixtures and use of LED light sources.

Dimmer is designed for noise-sensitive environments. No semiconductors used, that can generate noise in microphone system and speaker systems. Has built-in filter for reduction of noise emitted by led power.

Dimmer comes with a button panel for control and/or network connectivity and customer-specific solutions.

Data: Type 121
